For Tuesday evening R tutorial ….

- Download R from http://www.r-project.org

  Click `Downloads', choose a mirror site

  Choose an operating system. Binaries ready for MacOS and Windows; Linux installation requires a bit of work due to flavors.

- Test R

  Double-click icon (MacOS) or type "R <CR>" (Linux).

  Try demo(graphics), demo(plotmath), demo(colors), demo(nlm)

  library(lattice) ; demo(lattice) [and others]

- If you are ambitious ….

  Go through introductory Penn State Summer School tutorials at

  http://astrostatistics.psu.edu/RLectures/day1.pdf
